Roopali Bhargava, BA

AADPRT Position: Program Administrator Caucus Chair

Roopali Bhargava graduated from McGill University, Montreal Canada with a degree in Psychology. Prior to her current position, Roopali held leadership positions as the Head of Global Operations for an international educational nonprofit and Regional Program Director for an international scientific research organization.

In 2012, Roopali joined Cambridge Health Alliance as Program Administrator for the Child and Adolescent Psychiatry Fellowship bringing with her many years of experience in leadership, program/project management and administration. As a team player she looks for ways to simplify, streamline and make more efficient any task she faces.

Current and past fellows of the fellowship share: Roopali is the consummate professional, whose tireless work behind-the-scenes made everything about fellowship run smoothly. In addition to doing all her tasks with professionalism, attention-to-detail, and thoroughness, she has a pleasant and warm spirit, and a can-do attitude, undeterred by challenges and handles everything that comes her way with aplomb. She was a bright and welcoming face in the training office, and a steady hand in the face of various changes and transitions.

Roopali also sits on the Child Psychiatry Division leadership team and volunteers at a non-profit organization as the project manager for an annual event.
