

## **Cleveland Clinic Adult Psychiatry Residency**

Cleveland Clinic Adult Psychiatry Residency is a medium sized program accepting 8 residents per class. We are part of the department of Psychiatry and Psychology which operates within the framework of the Neurological Institute. Cleveland Clinic has been one of the nation's TOP hospitals for many years. We see patients from all walks of life; from numerous countries, states, a variety of economic backgrounds, as well as being racially, ethnically, and culturally diverse.

While we deliver "World Class Care", we do so from a Midwestern perspective of kindness. Our residency is known for its balance in biological as well as psychotherapeutic modalities and the curricula is fluid. The didactic half + day is protected and includes process groups for each PGY class. We are known for advocating on behalf of our residents, being receptive to feedback, having an open door policy and treating one another with respect and care. We are a 'family' and desire each of our residents with their unique desires and aspirations to thrive in their desired area of psychiatry. Those who are passionate, hard-working, want abundant opportunities, and a family like atmosphere, please contact us!
